Imparting Education, Shaping Futures

Swapnil Gondkar,
Founder, Itvedant Pvt Ltd

In today's fast-paced world, if you acquire the right skill set, nothing can stop you from achieving your dreams. I have always believed that Education is paramount to climbing the ladder of success. However, for me, the journey doesn't end there. It culminates after passing on the knowledge acquired through Education to people who have the fire in their bellies to succeed.

Like my grandmother and mother, I took to teaching. After completing my engineering studies at VJTI, I started my classes at I.T. Vedant. From a humble beginning in 2012 with a one-room kitchen teaching facility in Kopri to multi-branch full-fledged coaching centres across India, I.T. Vedant has come a long way. It's not just the institute that has grown by leaps and bounds but also the learners who have passed out from here, carved a niche for themselves, and made us proud.

Living in this techno-savvy world, you cannot get away if you remain aloof from technology. Realising the immense potential of technology, especially information technology, we at I.T. Vedant have designed state-of-the-art curricula and programmes that meet the industry's needs. We are blessed with qualified and experienced teachers who make the entire process of learning enjoyable. Our learners have already reaped the benefits of the teaching imparted at I.T. Vedant and sought the advantage of guaranteed jobs by getting placed with reputed companies.

One life can change the world, and Education can change this one's life. As it is said, "There is light at the end of the tunnel," I feel that Education is the light that helps you easily pass through the dark tunnel of ignorance.

Itvedant now in Nagpur!

Itvedant Education Pvt. Ltd. has proudly inaugurated its 15th branch in Nagpur, marking a significant milestone in its journey of empowering learners through practical, career-oriented education. This latest expansion underlines the institute's commitment to reaching more learners across India with high-quality training in IT, data science, and emerging technologies. From its humble beginnings in Thane,

Itvedant has evolved into a trusted educational network with a presence in major cities including Mumbai, Bangalore, Hyderabad, Chennai, and Delhi. The new Nagpur centre is set to serve as a vibrant hub for aspiring IT professionals in Central India, equipped with modern infrastructure and expert faculty.

Speaking on the occasion, the management shared, "The launch of our Nagpur branch reflects our ongoing promise to transform

more lives through accessible, industry-relevant education. We're grateful to our learners, staff, and partners who continue to fuel this mission."

With each new branch, Itvedant takes a step closer to its vision, bridging the gap between education and employment, and preparing the next generation of skilled professionals for India's growing digital economy.

12 Years of Transforming Career

At Itvedant, career transformation isn't just a goal, it's their purpose. Over the past 12 years Itvedant began as a spark of an idea, to make meaningful education accessible, practical, and truly career-oriented. Today, that spark has lit the path for thousands of learners who walked into their classrooms with hope and walked out with confidence.

Every journey at Itvedant begins with curiosity. Learners join Itvedant from diverse backgrounds, some fresh from college, others seeking a new start, and each one brings a dream. The institute's role has been to turn those dreams into structured paths, filled with knowledge, guidance, and real-world preparation. Throughout the years,

Itvedant's classrooms have evolved from whiteboards to smart boards, from local faculties to national mentorship, but their core belief remains unchanged: learning should be immersive, guided, and transformative. They have cultivated a culture where asking questions is encouraged, challenges are celebrated, and growth is constant.

It's not just about what they teach, but how their learners learn, together, with support, resilience, and a vision for the future.

As Itvedant is on the cusp of completing 13 years of educational excellence, the institute looks back with pride and forward with purpose. The journey continues, not just for Itvedant, but for every learner who chooses to grow with them.

Why Learning to Learn is the New Career Skill

Is life today easy? It's a common question that everyone asks themselves, whether is there a path they choose that will make their life easier. Today technology is taking over the world and its not only leading to advancement but also teaching different skills. Out of all these skills one significant skill is the need or want to learn. Whether life is hard or easy it will always teach you something. Its not about the details of what you learn but its about the effort that you put in to actually learn. The ability to learn and grasp and to put it in effect is a skill that's becoming an ultimate asset in today's world.

The constantly upcoming changes have overpowered the conventional education.

A decade ago, life was so simple, where you had to just acquire the knowledge and a degree in the field you need to pursue. But today with fields like computer science, data science, coding, etc, are advancing at such a pace and bringing immense change in the work life of the people. The skills that you acquired through you degree could easily become old

in no time.

Currently, our education system has forced the youth to compete, or get the highest GPA but is that really what's important? Life is constantly changing, the ability to adapt to the constantly evolving environment is a life skill that no school or college teaches. And the person who masters that, there is no stopping further.

From Static Knowledge to Dynamic Skills

Being exceptionally brilliant academically were the older standards of employability. But today more than academic scores, practical knowledge, experience and the capacity to adapt is more valued. This change is not only about the technicalities but also the actual skills somebody has, and the energy to thrive, to learn new things and give up orthodox practices to adapt to the new ones.

This is especially critical in tech-driven sectors. For example:

- AI professionals must stay updated on evolving algorithms, ethical challenges, and new frameworks.

Mayuresh Naik,
Managing Director,
Itvedant Pvt Ltd

- Data scientists need to constantly learn new tools, languages, and statistical methods to remain effective.

- Cloud engineers must keep pace with shifting platforms, certifications, and architectures.

These skills sets aren't something that you learn once and your job remains static. These fields are of highly dynamic nature, and requires great amount of curiosity and a strong ability to grasp. One cannot

remain fragile.

Learning Agility: The Real Competitive Advantage

"Learning Agility"- the ability to quickly and effectively learn, unlearn and apply new knowledge in unfamiliar situations. It is a deadly combination of curiosity, understanding, adaptability and application. This ability is highly recognized by most people in this generation. This trait has constantly been taken into account when an interview is taken place.

In which they're asking:

- Can this person figure things out quickly?
- Do they embrace new challenges and technologies?
- Are they open to feedback and change? Those who answer "yes" to these questions are the future leaders and innovators.

The Rise of Self-Directed Learning

Learning and understanding these skills have never been easier. Skills like these have now become easily accessible through, countless online courses, micro platforms,

coding camps, internships etc. These platforms empower the youth and shape their own future. Online learning has made education easily accessible and reachable, putting behind the need of having physical appearances or meeting limited to a particular room.

This open approach towards education has opened more doors for people. People have become so curious today that they are constantly experimenting and learning through the process of trial and error, rather than waiting for guidance.

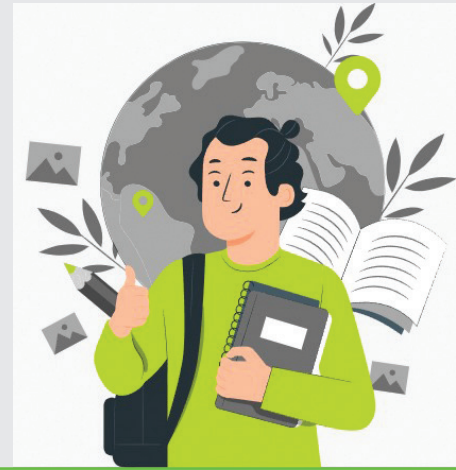

The Take Away: Learn Fast or Fall Behind

Relevance is the key to success. People who are required in this field do not necessarily have an exceptional resume but have enough skills to develop, learn, adapt and recognition.

So, the actual question that one should be asking isn't, "What should I learn next" but rather, "How should I learn faster and effectively to thrive in my field".

Because in the new world of work, learning to learn is no longer optional — it's the ultimate career skill.

Itvedant courses: ahead of times !

Itvedant has always been at the forefront of career transformation, and now, they are taking a bold step forward by expanding their offerings beyond core IT education. With the launch of three dynamic new programmes, Software Testing, Investment Banking, and DevOps with AWS, Itvedant is opening new doors for learners to enter high-demand, future-ready industries.

This expansion reflects their commitment to staying ahead of market trends and preparing learners for a broader range of career opportunities. While IT remains a strong foundation, the institute recognises the growing need for skilled professionals in finance, quality assurance, and cloud infrastructure. Itvedant's new courses are designed with the same promise, practical learning, industry alignment, and strong placement support.

Software Testing enables learners to ensure software reliability in today's tech-driven world. Investment Banking prepares learners for lucrative roles in the financial sector with an in-depth understanding of markets and analytics. DevOps with AWS equips professionals to manage complex systems with automation and efficiency.

This evolution marks a new chapter for Itvedant. It is not just an IT institute; it is a launchpad for versatile careers. By spreading their wings into new domains, Itvedant continues to empower learners to thrive, adapt, and succeed in a fast-changing world.

Walking into I.T.VEDANT for the first time, I was a bit anxious but at the same time excited. My name is Anurag Sharma, and my journey at Itvedant has been anything but straightforward. After completing my BE in Computer Science in 2016, my path diverged in unexpected directions. Life threw personal challenges my way, leading me to work as a Technical Operations Manager and later venture into the interior business. However, the pandemic and subsequent challenges caused both careers to come to an abrupt end.

By June 2023, I felt a strong desire to shift towards a career in software development. Academic gaps in my resume marred my attempts to enter the IT field. I was disheartened until I discovered Itvedant, a beacon of hope amidst my struggles. The turning point came when I met Career Guide Utkarsh Singh. His warm, reassuring demeanour and detailed guidance rekindled my hope.

The learner induction session marked the start of my journey. The academic phase was a rigorous yet exhilarating experience. For the next 120 days, I threw myself into my studies, tackling various technologies, including Django, HTML, CSS, JavaScript, and Python. Balancing this with life's demands was no easy feat. There were days when the pressure felt overwhelming, but the unwavering support from my Academic Coordinator and mentors kept me on track.

At Itvedant, life extends beyond textbooks and into the realm of practical skills, creativity, and personal growth to ensure holistic

From Day One to Career Ready at I.T.VEDANT

development. We attended Academic Events that empowered our Knowledge and Skills, extracurricular events that fostered our Communication and Creativity, & Fun Activities that helped build bonds and celebrate life.

The intensity ramped up between days 120 and 140 with critical evaluations, the Course Completion Exam (CCE), Project Evaluation,

and Internal Mocks. Crossing each milestone confirmed that all my hard work was paying off and the final phase was within reach.

The placement phase included Placement Inductions, HR Grooming Sessions, and Boot Camps. Each of these experiences added depth to my journey. The Placement Team was pivotal, offering guidance, preparing me for interviews, and assisting with job applications. Their support was unwavering, even as I faced rejections. My efforts culminated in securing a position as a Java Developer at Proteus Technology.

Reflecting on my journey with Itvedant, I am overwhelmed with gratitude. From the initial nervousness during the counselling session to the triumphant moment of receiving my job offer, every phase was marked by

challenges and victories. Itvedant provided more than just technical skills; it offered a transformative experience that helped me realise my aspirations. The rigorous academic requirements, including maintaining a 75% score in Assignments, Assessments, and Attendance (3A), were challenging but essential in preparing me for the IT industry. Itvedant taught me that success is a partnership, while the institute offers the tools and support, the learner's dedication and effort truly make a difference.

As I step into my new role at Proteus Technology, I carry with me technical expertise and the confidence and resilience built through this remarkable journey. Itvedant has been more than an educational milestone; it has been a life-changing experience I will forever cherish.

Industry applauds on I.T. VEDANT

I appreciate the quality of service you've consistently provided. Your professionalism, responsiveness, and commitment to delivering well-matched candidates have made the hiring process smooth and efficient. The candidates you've shared have demonstrated solid technical knowledge and the right attitude—clearly reflecting the standards upheld at Itvedant.

Your support has been immensely valuable, and I truly admire your attention to detail and proactive approach.

As we continue working together, one suggestion for improvement could be exploring a wider pool of candidates with diverse skill sets, especially for niche roles. Additionally, a quick monthly check-in to discuss upcoming requirements or candidate feedback might help in aligning better with our hiring goals.

Overall, it's been a great experience working with you, and I look forward to continued collaboration. Keep up the great work!

- Rushab Shirke, Founder, Digi Emperor

It has been a pleasure collaborating with your team throughout the recruitment activities.

Learners are well-prepared, technically sound, and professional during the entire selection process. Their knowledge of specific skills and their problem-solving abilities were commendable. The support provided by your placement team was also prompt and efficient, making the hiring experience smooth and well-organised.

We are excited to onboard the selected candidates and look forward to seeing them contribute to our organisation. Based on this positive experience, we are enthusiastic about continuing our partnership with your institute for future recruitment drives.

-Komal Borkar, Mounarch Tech

I appreciate the service you've consistently provided. Your professionalism, responsiveness, and commitment to delivering well-matched candidates have made the hiring process smooth and efficient. The candidates you've shared have demonstrated solid technical knowledge and the right attitude—clearly reflecting the standards upheld at Itvedant.

Your support has been immensely valuable, and I truly admire your attention to detail and proactive approach.

- Dreams International

We are grateful that we got to coordinate with you for this campus drive. Thanks to this drive we got a great candidate to join our company.

Next time when there is an opening at our company, I'll be sure to reach out to you and we can work together in the future as well.

Placements Start from Day One at Itvedant

Itvedant believes that placements are not an afterthought, they are an essential part of every learner's journey from day one. Its dedicated placement team plays a proactive role, engaging with over 30 companies every day to identify job roles that match learners' evolving skill sets. With strong industry partnerships and a forward-thinking approach, the

team doesn't wait for opportunities to appear, they actively create them.

From initiating the first conversation with recruiters to providing end-to-end support during the hiring process, our placement team ensures each learner is fully prepared for the professional world. Resume building, mock interviews, and personalised career guidance are

part of the process, helping learners approach interviews with clarity, confidence, and competence.

This approach is rooted in Itvedant's core belief: that education should lead to employability. With every successful placement and every offer letter received, the institute moves one step closer to fulfilling that promise, for each and every learner.

Victory Voices

Chinmay Shinde

“

I enrolled in the Python Web Development course at Itvedant. Coming from a non-IT background, I was initially unsure about transitioning into the IT field. However, Itvedant made this journey smooth and achievable. The knowledgeable trainers, supportive atmosphere, and helpful management played a major role in my learning process. They patiently addressed every query I had and ensured I understood each concept clearly.

I'm truly grateful for all the support and guidance provided throughout the course. Thank you, Itvedant!

Aditya Yadav

“

When I joined the Full Stack Development with AWS course in 2024, I was eager to learn but unsure where to start. The structured curriculum, hands-on projects, and expert guidance from the instructors turned my curiosity into confidence. From front-end (HTML, CSS, JavaScript, React, Angular) to back-end (Python, Django, Java, SpringBoot, SQL, MongoDB) and AWS cloud integration, every module was designed with real-world applications in mind.

What truly set Itvedant apart was the practical approach—building projects, solving challenges, and getting personalized feedback. Thanks to their training, I'm now working as a Full Stack Developer Intern at Dossiefoyer, applying my skills daily.

I'm deeply grateful to the entire Itvedant team for their unwavering support and for equipping me with the tools to succeed in tech. If you're looking to jumpstart your career in development, this is the place to be!

Lauren Menezes

“

I enrolled in the Python Fullstack course at Itvedant with the aim of improving my knowledge in the tech field, and I can say that the experience turned out to be quite valuable for me. The course structure covered both front-end and back-end concepts in a balanced way, and the hands-on projects helped me understand how everything connects in real-world development.

The trainers were knowledgeable and approachable. Even when I had trouble keeping up with certain topics, they took the time to explain things in simpler terms without making it feel rushed. I appreciated that the learning environment felt supportive rather than intimidating.

In terms of placements, I was able to secure a role at Inkstall Educare, and the placement team at Itvedant did help with interview prep and resume reviews. It wasn't an overnight process, but with consistent effort and guidance, it came together.

Overall, my experience was a good one, and I feel more confident now stepping into this field.

Campus drives bridge the gap between education and employment

Itvedant's mission goes beyond imparting knowledge, it aims to equip learners with the practical skills and industry exposure needed to build successful careers. One of the key initiatives that supports this vision is its regular Campus Placement Drives.

These drives bring leading companies directly to Itvedant's campuses, offering learners the opportunity to engage with top recruiters and secure roles that align with their training and aspirations. By creating a direct pathway from the classroom to the workplace, its placement drives help bridge the gap between academic learning and real-world professional requirements.

The process not only builds confidence but also provides learners with a clear understanding of industry expectations. Many of the learners have kick-started rewarding careers through these opportunities, a testament to the effectiveness of Itvedant's approach.

Itvedant does not just prepare learners for jobs, it prepares them for long-term success in the evolving tech landscape.

Inkinstall - Andheri

Technologia Innovations - Pimpri

Let's get corporate ready!

In today's world, getting jobs isn't an easy task as recruiters weigh a lot of thing when hiring. They look for people who are actually tech savvy, value ethics and always want to keep growing and developing themselves. As a corporate manager, I have monitored these changing recruitment patterns closely and analysed the priorities that are heavily considered for a job. These patterns provide a clear picture of the kind of skills that are required for a particular job and the kind of training that is to be provided, balancing between academics and technical knowledge.

Recruiters heavily focus on three major factors: Attitude, Skills and adaptability. Not only the technical fluency in field like data analysis and programming is considered but also that individual's skills like learning and problem-solving gets them

Soumya Majumdar
Corporate Relations Head
Itvedant Pvt Ltd

the required recognition. The way one presents themselves is also significant as that speaks a lot about ones persona. The communication skills, the way on dresses, the posture everything is noticed by the eyes of the recruiters.

To address these expectations, we prepare our learners through a well-structured placement readiness programme. This includes mock interviews, resume-building workshops, technical assessments, and

soft skill enhancement sessions. We simulate real-world interview scenarios to boost their confidence and help them tackle both HR and technical rounds effectively.

We also provide with the most recent and efficient industry tools and working patterns. Field projects and internships provided by us gives them an actual experience that is valued and recognised by the recruiters. We also maintain strong corporate relations to bring in relevant job opportunities and mentor students based on each company's specific hiring patterns.

Our goal today is to help provide the youth today with the required skill set to embark on a journey of life with skills making them job-ready professionals. We ensure that the recruiting patterns and our methods are align, giving the learners success in their recruitment processes.

Work Hard Today For A Better Tomorrow

The techno-savvy world today is fast-paced. What started in the beginning with programming languages such as ‘C’ and ‘Java’ is now a powerhouse of the world today supported with artificial intelligence. The youth of today who are aspiring to be professionals in this field can face this as a challenge but also a great opportunity to learn. Gaining success in this field is not easy but can be done right with the correct training and guidance. It becomes crucial to be prepared for anything on this journey of success.

The Shift in the Tech Landscape
The IT industry has constantly been evolving, it has gone from coding and simple software languages to solving the problems of today using complex AI technologies. Today modern businesses require proficiency in areas like Artificial intelligence and machine learning, web-based platforms such as AWS and azure for efficient work, DevOps for streamlining and integration, and data science for huge data-sets.

These aspects not only require knowledge

from books but also practical knowledge through real-life experiences. This is where institutes who believe in the future come into picture.

How Training Must Evolve

Traditional education supported only book knowledge and was restricted to the orthodox methods but today modern fields require skills like problem-solving, adapting to the environment, real-life experiences, field work, etc. Training for this field should not be restricted to classrooms but should explore new ways of learning.

This is the major focus of Itvedant when taking up the duty of training today’s youth into being professionals in this field. The curriculum is designed with continuous input from industry experts to ensure it reflects current trends and tools.

Roshan Jaiswal
Head of Faculty
Itvedant Pvt Ltd

The Itvedant Advantage: 80-20 Learning Approach

Itvedant follows a unique method, where 80% of their learning focuses on real life experiences, field work and project-based learning, while 20% covers the clearing of theoretical and fundamental concepts. This method makes sure that learners don’t just learn new things, they also build the confidence and skills to use them in real-life situations.

By doing complete projects and working on case studies based on real companies, learners face actual problems. This kind of training helps them think clearly, work well with others, and come up with creative solutions which are the qualities that companies really look for.

Role of Trainers: More Than Instructors

In today’s learning style, trainers at Itvedant

are not just teachers but are also mentors from the industry and help learners build skills. They have hands-on experience with tools and technologies, and they help learners develop a professional way of thinking.

They focus on practical learning, give personal feedback, and regularly check progress to prepare learners for current and future jobs.

Learners don’t just get a certificate after completing their training but they finish with the skills, a strong portfolio, and the confidence to apply for top jobs in fields like data science, full-stack development, cloud computing, and more.

Training for Tomorrow: Today

In the tech world, things change fast and new tools come up quickly. The only thing that stays the same is the need to keep learning.

Itvedant gives future-ready training that helps learners not only get their first job but also grow and learn throughout their careers.

For those who want to be part of tomorrow’s tech world, getting the right training today is not just helpful but it’s a must.

Expert Trainers at Itvedant: Shaping Future-Ready Professionals

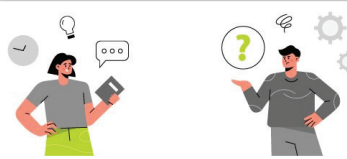

At Itvedant, the training team is the backbone of its commitment to delivering high-quality, industry-relevant education. Comprising seasoned professionals with deep domain expertise, its trainers bring current market knowledge into the classroom, ensuring learners are equipped with the skills employers are looking for today.

The training approach is structured, practical, and focused on clarity of concepts. Through a blend of hands-on sessions, real-world assignments, and continuous feedback, learners build a strong foundation in both theory and application. Trainers conduct regular evaluations to monitor individual progress and offer personalised support to address each learner’s needs.

Beyond academic instruction, its trainers collaborate closely with the academic and placement teams to align course content with current job market requirements. This integrated approach not only enhances technical proficiency but also builds the confidence learners need to succeed in interviews and thrive in professional settings.

At Itvedant, its trainers are not just educators, they are mentors guiding learners toward successful IT careers.

More than 600 learners placed in 6 months!

Our Learning Platform

WingZ, our dedicated one-stop learning platform for doubt resolution, mentor sessions, interview updates, learning journey tracker and overall growth.

Life at Itvedant: A Holistic Learning Experience

Learner life at Itvedant is vibrant, engaging, and designed to promote all-round development. While technical training remains at the core, the overall experience goes far beyond the classroom. Learners actively participate in group discussions, project showcases, hackathons, and cultural events that foster collaboration, innovation, and creative thinking.

These activities are instrumental in helping learners build essential soft skills such as communication, confidence, and leadership. Celebrations of festivals, themed days, and fun-filled workshops bring energy and joy to campus life, creating a well-rounded academic environment.

Guest lectures by industry experts and regular industry interactions further enhance the learning journey by exposing

learners to real-world insights and expectations. This blend of academic rigour and extracurricular engagement ensures that learners are not only job-ready but also personally enriched.

At Itvedant, education is more than just gaining knowledge, it's about creating lasting memories, building lifelong connections, and shaping confident professionals ready to thrive in any environment.

Jingle Byte Christmas Coding Competition sparks creativity

The Jingle Byte Christmas Coding Competition 2024 was a thrilling and festive coding challenge aimed at sparking creativity and innovation among tech enthusiasts. Designed to celebrate the holiday season with a technical twist, the competition invited individual participants to take on exciting Christmas-themed problem statements. Competitors had the option to choose between two engaging tracks, Full Stack Development and Data Science/Data Analytics, showcasing their skills in a high-spirited, competitive environment. This event was conducted entirely online.

Technologies & Problem Statements

In the Full Stack Development track, developers could choose to work with Java or

Python to tackle a variety of Christmas-themed challenges, including Christmas Gift Wishlist Manager, Virtual Christmas Card Creator, Santa's Logistics Tracker, Christmas Recipes Hub, and Festive Light Decorator Planner.

The Data Science track focused on applying analytical techniques and machine learning to various festive problems using publicly available datasets: Predicting Christmas Shopping Trends, Gift Recommendation System Using ML, Forecasting Holiday Weather Impact, and Analysing Global Christmas Festivities.

For the Data Analytics track, participants developed dashboards and analytical reports to gain insights from Christmas-related datasets: Christmas Market Analysis Dashboard, Holiday

Spending Analysis, Festive Movie Preferences, and Holiday Traffic Insights.

Evaluation Criteria

Submissions were judged on five key criteria. Innovation and Creativity carried the highest weight at 30%, assessing how unique and imaginative each solution was. Technical Skill accounted for 25%, evaluating the depth of knowledge in the participant's chosen tech stack. Functionality made up 20%, focusing on how well the project met its intended goals. Presentation was worth 15%, highlighting the clarity and quality of the video demo and documentation. Lastly, Scalability and Impact had a 10% weight, considering the project's potential for real-world application and growth.

Celebrating Success

Ignitive 2025 recognises Itvedant's superstars

AISHWARYA BARAWKAR
1ST QUALIFIERTEJAS SHIRSAT
WINNERPRATHNA KAUR
2ND QUALIFIERChetan Vyapari
2ND QUARTERSamruddhi Devghare
3RD QUARTERRISHABH KAVEDIA
4TH QUARTERPoonam Singh
1ST QUARTER

The Ignitive event at Itvedant is always a resounding success, pulsating with energy, gratitude, and a spirit of recognition. This vibrant ceremony is more than a celebration it is a tribute to the relentless efforts of our warriors who drive the transformation of learners' lives every day. With a blend of electrifying performances, heartfelt speeches, and motivating stories, the event reignited Itvedant's collective commitment to excellence and innovation in education.

Among the key highlights were the prestigious awards presented to top-performing team members, who have consistently pushed the boundaries of dedication and creativity. Noteworthy winners included Employee of the Quarter 1 - Poonam Singh, Employee

of Quarter 2 - Chetan Vyapari, Employee of Quarter 3 - Samruddhi Devghare, Employee of Quarter 4 - Rishabh Kavedia, Dream Team Award - Operations, Branch of the Year - Borivali, Employee of the year - Tejas Shirsat (IT Department) and many more, who stood out for their remarkable contribution across sales, training, operations, HR and learner success.

The vision behind Ignitive was clear to recognise and honour the employees who embody Itvedant's mission of reshaping the future of IT education. These team members are not just employees; they are visionaries shaping careers, leaders empowering learners, and changemakers igniting a brighter tomorrow. Ignitive reminded every attendee that at Itvedant, excellence is celebrated, and every contribution counts.

Flexing creativity with Knowledge Bytes

Itvedant is India's one of the most recommended IT training institutes. They specialise in providing quality education and placement assistance to their students. They take up various initiatives to encourage students to constantly learn and participate, similarly they came up with this initiative in December called 'Knowledge Bytes'. Its one of their most captivating projects of all. This contest is designed for students to have a platform to create real-life video content, for them to connect, create, and establish themselves into the video creating world. This contest involves various categories like Educational Tutorials, Student Projects, Case Studies, Campus Life & Personal stories which was considered intriguing and generated a great amount of interest and curiosity amongst students across branches leading to a large participation.

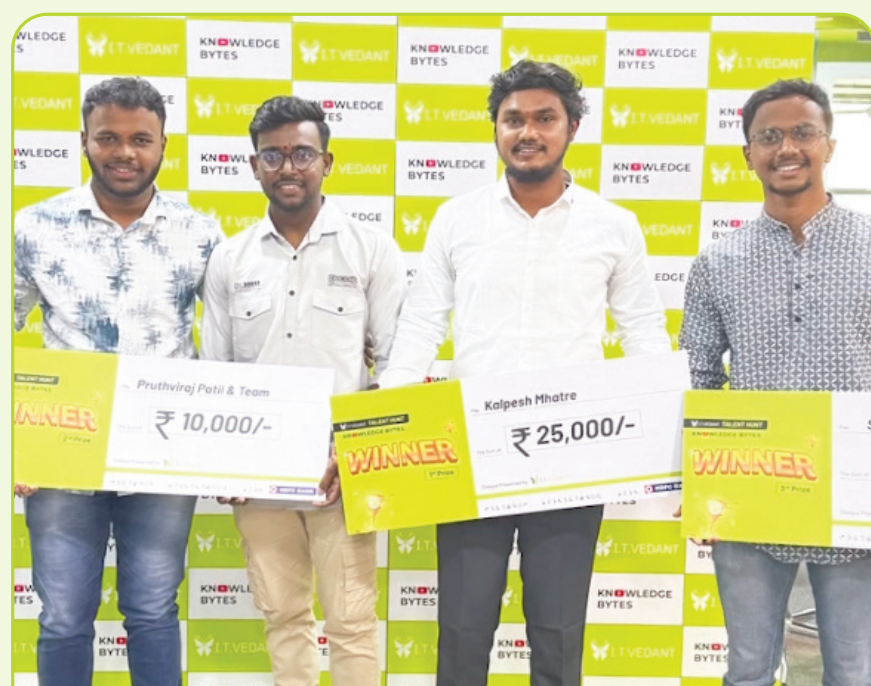

The contest acknowledged their tech-

saviness and creative flair which helped boost their confidence in presenting or portraying themselves on a platform like Youtube, which is an important skill in today's world.

After the videos were submitted, they were reviewed thoroughly where their video quality, originality and how many people they reached was taken into account and the winners were declared too with 1st Place to Mr. Kalpesh Shrinath Mhatre, 2nd Place to Pruthviraj Patil and Team, and 3rd Place to Sahil Vijay Shelar and Team, respectively.

The winners were rewarded with cash prizes and a recognition all over Itvedant's social media platforms.

The success of 'Knowledge Bytes' reflects Itvedant's focus on encouraging learning beyond textbooks and classrooms, empowering students to explore, create, and lead in the digital age.

Itvedant: The Perfect Second Home

At Itvedant, employees don't just work together, they grow together, like one united family. Every employee, regardless of their role or department, is a valued part of a close-knit team that believes in mutual respect, shared goals, and collective success.

Itvedant's work culture goes beyond tasks and targets. It's built on trust, transparency, and togetherness. From the very first day, new members are welcomed with warmth and guided with care. Open communication is encouraged, and every voice is heard, whether it's a new idea, feedback, or concern.

Not just milestones, but also the small everyday wins

are celebrated. Birthdays, festivals, team outings, and recognition events are moments that bring the team closer, helping them bond beyond professional boundaries. During challenges, they stand by each other; during victories, they celebrate as one.

Learning and growth are continuous at Itvedant, not just for its learners, but for its team. Training, cross-functional exposure, and internal promotions ensure that everyone has a clear path forward. It is a simple belief that when people feel like they belong, they give their best. And that's why Itvedant is not just a workplace, it is a family with a shared mission and a bright future.

Down

4. Genius who proved that time bends, and so did minds!

5. Where you spend years dodging homework and collecting report cards.

6. The quietest place that holds the loudest knowledge.

1. A classic wooden tool that often gets shorter with every idea.

2. Subject feared by many, loved by few, ruled by numbers.

3. Guides you through ABCs to PhDs.
