

I.T. VEDANT Expands Presence With New Branches In Ahmedabad & Lucknow

Continuing its mission to make career-oriented education accessible across India, Itvedant has expanded its presence with the launch of two new branches, in Ahmedabad on 20th August 2025 and Lucknow on 12th November 2025.

This dual expansion marks another milestone in Itvedant's journey of growth, reflecting its vision to empower students nationwide with skill-based, industry-aligned learning.

Ahmedabad, known as a dynamic hub for education and technology, now serves as a key node in Itvedant's growing network. The new centre offers a modern academic infrastructure with equipped classrooms, advanced labs, and personalised mentoring facilities, creating an environment where students can learn, innovate, and prepare for future careers.

Similarly, the newly inaugurated Lucknow branch represents Itvedant's foray into northern India, bringing its renowned model of practical and placement-driven education to one of the region's most promising student communities. The centre is designed to function not only as a learning

space but also as a career transition hub, offering mentorship, industry interaction, and placement support.

With these additions, Itvedant continues to reinforce its commitment to bridging the gap between education and employment, ensuring that students from every region have access to quality training and career opportunities in emerging technologies.

13 Years, 13 Lessons: What Itvedant Has Taught Us About Growth

Itvedant completed 13 years in the field of skill-based, industry-aligned education. As the institution reflects on more than a decade of progress, it also acknowledges the key principles that have guided its journey. Each year brought with it new challenges, new opportunities, and valuable insights. Together, they form a foundation that continues to shape the future of Itvedant. Here are thirteen lessons that stand as pillars of its growth:

1. Purpose is the Starting Point
A clear academic mission has defined every initiative since the beginning.

2. Consistency Builds Trust
Sustained effort, not trends, has helped earn credibility.

3. Curriculum Must Stay Current
Programmes are reviewed and adapted to match evolving industry needs.

4. Student-Centricity Drives Impact
Every policy and process is designed with learner outcomes in mind.

5. Real-World Relevance is Non-Negotiable
Application-oriented learning remains central to the teaching model.

6. Faculty Are the Foundation
Skilled trainers have played a critical role in delivering consistent value.

7. Placement is a Promise, not a Perk

Career transition is not an end—it's a core objective.

8. Adaptability Ensures Longevity
From new technologies to teaching formats, evolution has been essential.

9. Infrastructure Must Empower Learning
Physical and digital learning spaces have been built for clarity and comfort.

10. Communication Builds Community

Ongoing student interaction has strengthened belonging and feedback culture.

11. Every Success Story Matters
Individual progress is viewed as a collective achievement.

12. Scale Must Not Compromise Quality
Expansion has been pursued without compromising standards.

13. The Vision Must Keep Growing
Looking ahead remains as important as reflecting back.

These lessons are not just internal reflections; they represent the ethos of an institution committed to relevance, responsibility, and results. As Itvedant steps into its fourteenth year, it continues to build on these learnings to further its impact on education and employment across the country.

Courses That Create Careers

In today's fast-paced job market, learning the right skills at the right time can transform a student's career path. Itvedant's courses are designed not only to teach technology but also to open doors to employment across high-demand industries. Each programme blends technical mastery, AI-driven learning, and placement-focused outcomes, ensuring that every learner transitions confidently from classroom to career.

Data Science & Analytics with AI

This programme focuses on making sense of data through modern analytical tools and AI-driven systems.

Java & Python Full Stack

Development With AI

A comprehensive programme

covering both frontend and backend technologies, this course trains learners to design and deploy complete web and software applications.

DevOps with AWS

Focused on automation and cloud deployment, this programme enables learners to bridge development and operations.

Digital Marketing with AI

A programme tailored for the digital economy, this course blends marketing strategy with automation and analytics.

Software Testing with AI

This course prepares students to ensure software quality through manual and automated testing methods.

Investment Banking with AI

A unique programme combining

finance, analytics, and AI-based decision-making, this course covers financial modelling, valuation, risk analysis, and business forecasting.

Every Itvedant programme is built around three key pillars: industry relevance, project-based learning, and assured placement support. Students gain access to an AI-powered LMS, global certifications (Google, AWS, HubSpot), and dedicated mentorship that ensures each learner's transition into a successful career.

As technology continues to redefine the future of work, Itvedant remains committed to offering programmes that align learning with opportunity, creating not just students, but professionals ready to lead in the digital era.

WILL AI TAKE OVER JOBS?

UNDERSTANDING THE SHIFT, NOT THE FEAR

Artificial Intelligence has moved from being a futuristic concept to a daily reality. From search engines that finish our sentences to systems that generate entire reports, AI has become deeply integrated into workplaces worldwide. This rapid transformation has led to a pressing question: Will AI eventually take over human jobs?

The short answer is, not entirely. But it will reshape them.

Many repetitive and process-driven roles are already being automated. Data entry, customer support, and basic administrative functions are increasingly handled by algorithms that work faster and without fatigue. However, this does not mean humans are being replaced; rather, the nature of work is evolving.

What AI cannot yet replicate are qualities like judgment, creativity, empathy, and contextual understanding. These remain the cornerstone of human contribution. The workplace of the future will not be man versus machine, but man with machine, a collaborative model where technology amplifies human capability.

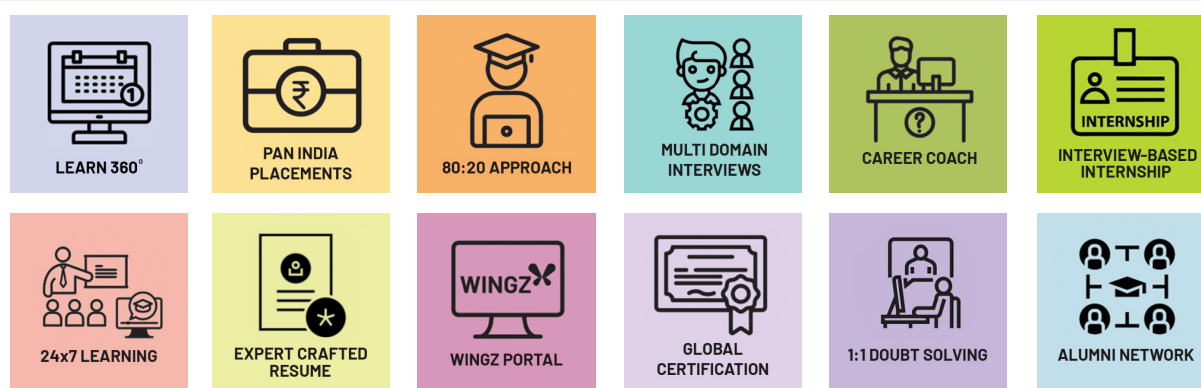

Several studies, including reports by the World Economic Forum, suggest that while millions of traditional jobs will decline, even more new ones will be created, in areas such as data science, automation design, digital marketing, cybersecurity, and AI-driven development. This means the workforce of tomorrow must be more agile, more technical, and more adaptable than ever before.

For students and professionals alike, this reality points to a single truth: continuous learning is no longer optional. Individuals who invest time in understanding new technologies and updating their skills will remain relevant and in demand. Education, once seen as a one-time stage of life, has now become a lifelong process.

Institutions that focus on skill-based, industry-aligned training will play a vital role in preparing learners for this future. Courses that combine technology, data, and human problem-solving will not only safeguard careers but also open pathways into new industries being shaped by AI.

The age of artificial intelligence is not an age of unemployment; it is an age of transformation. Those who learn to adapt will find themselves not replaced by AI, but empowered by it.

Why Learners Choose I.T.VEDANT For Career-Ready Education

In today's competitive job market, education alone is not enough; what matters is industry-relevant knowledge, practical skills, and strong placement support. For over 13 years, Itvedant has established itself as a trusted name in career-oriented learning by combining these elements into one comprehensive model of education.

Courses Aligned with Industry

Itvedant offers specialised courses. Each curriculum is regularly updated to match the evolving needs of the IT and analytics industry.

Practical Training Approach

Unlike conventional teaching methods, classes at Itvedant emphasise hands-on learning. Students work on projects, case studies, and real-world

scenarios to ensure they can apply concepts effectively in professional settings.

Placement-Focused Learning

The institution takes pride in its strong placement record. With dedicated placement teams and corporate tie-ups, thousands of students have successfully transitioned into careers across leading companies.

Expert Faculty and Mentorship

Experienced trainers, industry professionals, and academic mentors provide personalised guidance to ensure students not only learn but also grow in confidence and career readiness.

Nationwide Reach, Local Support

With 16+ branches across India, including the newly launched centre in

Ahmedabad, Itvedant provides students with access to structured classrooms, modern infra, and consistent academic support, no matter the location.

Learner Success as the Core Mission

At Itvedant, every student's journey matters. The institution is not only about delivering courses, but about ensuring each learner achieves their career goals with the right skills and direction.

Choosing Itvedant means choosing clarity, confidence, and career growth. With a balance of academic rigour, practical exposure, and placement assurance, the institution continues to stand out as a destination for students aspiring to build a future in technology and analytics.

PLACEMENT FROM DAY ONE

At Itvedant, career preparation doesn't begin after a course ends; it begins on the very first day of learning. The institution's "Placement from Day One" philosophy ensures that every learner progresses through a structured journey designed to transform classroom knowledge into professional readiness.

From the initial weeks of training, students are guided through both technical mastery and placement preparation, enabling them to apply for relevant job profiles even after completing 50% of the syllabus. This early access to opportunities helps learners gain confidence and clarity about their career paths while they are still in training.

After the completion of the course modules, learners undergo a rigorous evaluation process that mirrors real-world expectations.

INTERNAL MOCK (IM) & PROJECT EVALUATION MOCK (PEM)

The Internal Mock (IM) and Project Evaluation Mock (PEM) form the first stage of post-syllabus assessment.

- **IM (15 Marks):** Students present their projects to an internal trainer, demonstrating the practical application of core concepts.

- **PEM (25 Marks):** A detailed project presentation evaluated by both internal and external trainers, focusing on innovation, execution, and clarity of understanding.

This process not only reinforces the concepts learned but also builds essential skills such as problem-solving, communication, and technical presentation, traits employers value most.

COURSE COMPLETION EXAM (CCE)

Following the project evaluations, students appear for the Course Completion Exam (CCE), an MCQ-based assessment covering the technologies and frameworks taught throughout the programme. The CCE ensures that each learner attains complete subject proficiency before stepping into job interviews.

JOB READINESS & UNLIMITED OPPORTUNITIES

Learners scoring above 75% in evaluations are officially tagged as "JR – Job Ready" candidates. This designation grants them unlimited access to job opportunities through Itvedant's placement cell. Those with a lower score still receive five guaranteed interview opportunities, ensuring every student gets a fair chance to begin their career journey.

sItvedant's structured placement system

is built on the belief that education must lead to employment. Every stage, from early job applications to project-based evaluations

and placement readiness, is designed to help learners enter the industry with both competence and confidence.

At Itvedant, we are dedicated to empowering students with the knowledge and practical expertise required to thrive in their careers. To facilitate this, we host regular Campus Placement Drives, bringing renowned companies to our doorstep to recruit emerging talent. These initiatives play a crucial role in narrowing the divide between academic learning and real-world professional demands, making the journey from classroom to career seamless. Countless students have launched successful careers through these placement opportunities.

Victory Voices

Dhanashree Lohar

B.E. Computer Science | Full Stack Developer

"Itvedant exceeded my expectations with its well-structured curriculum and knowledgeable instructors. Each session of the Python Web Development programme was clear, detailed, and easy to follow, making my learning experience smooth and enjoyable. The faculty's constant support and guidance helped me build a strong foundation in Python web development. I was able to grasp concepts quickly and apply them effectively. Itvedant not only gave me the skills but also the confidence to move ahead in my career. I truly

appreciate the effort and quality they put into their programme."

Jignasa Dcosta

B.M.S. | Full Stack Developer

"My journey with Itvedant began as a Graphic Designer when I pursued Graphic Design here. Later, my interest shifted toward UX Design, and that curiosity led me to explore how websites and applications function on the backend. Coming from a non-IT background, I was initially unsure about transitioning into the tech industry. That's where Itvedant truly made a difference. The Full Stack Development with Python course was very well-structured, and the faculty members were extremely supportive. Today,

I feel confident and capable of pursuing a career in the IT field. Thank you, Itvedant, for making this transition possible."

Shubham Dongarwar

B.Tech in Computer Science & Engineering | Solution Architect

"When I joined the programme at Itvedant, I was completely new to cloud computing. The practical, hands-on learning approach helped me gain clarity and confidence. The real-time projects provided a production-level experience, bridging the gap between theory and application. Coming from a development background, I found this course extremely impactful. The consistent guidance and encouragement from the faculty made my journey productive, smooth, and career-defining."

Harshali Pawar

Company Name : Core5 System & services Pvt Ltd

I wanted to extend my heartfelt thanks to you and the team at IT Vedant Institute for hosting us during the recent recruitment drive. Your warm welcome, the excellent hospitality, and the delicious meals truly made our visit memorable. We also want to express our gratitude for the supportive, cooperative, and helpful nature of the IT Vedant staff. Their assistance throughout the process was invaluable and greatly appreciated.

We were very impressed with the calibre of candidates, and it was a pleasure to interact with such talented individuals.

We look forward to continuing our collaboration and hope to engage with more talented professionals from IT Vedant Institute in the future.

Once again, thank you for all the arrangements and support throughout the recruitment process. We greatly appreciate your efforts and look forward to working together again soon!

Divya Setiya

Company name - The Impact Engine

I would like to take a moment to express my gratitude to IT Vedant for its invaluable support in providing us with a talented pool of students during our recent hiring process. One of the candidates from your institution was successfully selected and has now been onboarded into our company.

I would also like to extend my heartfelt thanks to Neha, who was our point of contact throughout the process. Her professionalism, responsiveness, and helpful nature ensured a seamless experience for us.

We truly appreciate your dedication to fostering talent and supporting organisations like ours in meeting their hiring needs. Looking forward to continuing this association in the future.

Priyanka Chavhan-Shelvante

Introducing the Wingz CSR Programme: Big Career Opportunities at Just ₹99!

At Itvedant, we've always believed that true education goes beyond classrooms and textbooks; it's about preparing individuals for the real world, equipping them not just with knowledge, but with the right tools, direction, and confidence to launch their careers. In line with this vision, we are proud to introduce the Wingz CSR Programme, a special initiative crafted to ensure that every learner has a fair shot at career success, at an unbelievable starting point of just ₹99.

A Pass That Opens Doors

The journey begins with a simple step: learners can enrol in the programme by paying ₹99 and receiving their Wingz Onboarding Pass. But this pass is not just a token; it's a powerful access card into a world of structured support, digital resources, and industry-oriented opportunities.

Once a learner receives the pass, they are invited to visit the nearest Itvedant branch, where our team walks them through the complete structure of the Wingz CSR Programme. They also receive their Wingz Credentials, which unlock

access to our dedicated learning and placement ecosystem.

What's Inside the Wingz CSR Programme?

The Wingz CSR Programme is not just a platform; it's a complete package designed to guide a learner from ambition to achievement. Here's what every participant receives:

• Internship Opportunities:

Gain hands-on experience with real-time projects through our corporate network. Internships help learners apply what they've learned and stand out in the job market.

• Job Alerts:

Stay informed with regular notifications about openings that match your skills and career goals. Our placement team curates roles that are suitable and timely.

• Interview Preparation:

From handling technical questions to presenting yourself confidently in HR rounds, we train learners to ace every stage of the interview process.

• Course Certificates:

Upon completing digital modules, learners are awarded certificates to validate their progress, valuable additions to their resumes and portfolios.

• Profile Building Support:

Learn how to build a professional resume and LinkedIn profile that highlight your strengths, skills, and readiness for industry roles.

• **Access to Digital Course Videos:** Learners get entry into our digital repository of pre-recorded sessions, allowing them to revise concepts and learn at their own

pace, anytime, anywhere.

A CSR Initiative That Makes a Difference

What makes this programme truly special is its accessibility. In a world where professional development resources often come at a high cost, Itvedant is making a bold statement: career readiness should not be a privilege; it should

be a possibility for all. By pricing the entry at just ₹99, we ensure that students from all backgrounds can benefit, without financial pressure.

More than a programme, Wingz CSR is a movement, one that empowers learners, breaks barriers, and brings structured, real-world learning to every corner of the country.

How Itvedant Prepares Learners for Real Jobs

At Itvedant, education doesn't end with lectures and notes; it culminates in real-world readiness. Our training model is built with the ultimate goal in mind: to help every learner transition seamlessly from education to employment. Here's how we make that happen.

Training That Leads to Transformation

Our programmes are structured with a well-defined progression: Learn • Build • Present • Placement.

1. Early Job Access (After 50% Completion)

We empower learners to start applying for jobs as soon as 50% of the syllabus is completed. This early exposure builds real-time job application experience and confidence. Learners can match their skill set with relevant profiles and start participating in placement opportunities.

2. Internal Mock (IM) & Project Evaluation Mock (PEM)

After syllabus completion, students face their first major milestone - IM and PEM, designed to simulate real interview and project evaluation scenarios.

• IM (Internal Mock):

Students present their understanding, communication, and technical clarity in front of internal evaluators. This carries

15 marks.

• PEM (Project Evaluation Mock):

Here, learners present a comprehensive project covering all technologies learned throughout the course. External industry experts assess technical depth, problem-solving, and presentation skills. This round holds 25 marks.

Together, IM and PEM ensure students are not only knowledgeable but also articulate, project-ready, and confident in presenting their work.

3. Course Completion Exam (CCE)

Following IM and PEM, learners appear for the Course Completion Exam (CCE), a final MCQ-based evaluation that covers all essential technologies taught throughout the course. It is a benchmark of conceptual

understanding and carries 10 marks.

4. Job Readiness (JR) Tag

Performance matters, and we recognise it. Once learners complete their training and evaluations, they receive five placement opportunities. But here's the game-changer:

If a student achieves more

than 75% overall score, they are officially tagged as Job Ready (JR).

With this JR tag, learners unlock unlimited access to job opportunities through Itvedant's placement portal, giving them a decisive edge in India's booming tech job market.

The training at Itvedant isn't just about knowledge, it's about

outcome. With industry-aligned evaluations, real project work, and a transparent scoring system, learners don't just complete a course; they complete their journey to becoming job-ready professionals.

Because at Itvedant, we don't just teach IT, we train for transformation.

Our Learning Platform
